# ABOUT NAMO

NAMO HiFi is a leading home automation service provider in Bangalore. We're dedicated to providing you the best of Smart Home/Commercial Space Automation with a focus on dependability Home/Commercial Space Automation Solution Products.

# what we Do?

We (NAMO HiFi) are engaged in offering optimum quality Smart Home and Commercial Space Automation Solutions for our esteemed customers. With the continuous support and sincere efforts put by our experienced professionals, we have been able to provide our clients the best quality Smart Home and Commercial Space Automation Solution Service.

# Converting Home Appliances into Smart Devices on a Budget

RETROFIT – Wise 4+1 Fan Node Smart switch work in sync with your existing electrical connections. No additional wiring is required. They fit inside your existing switchboard.

- · Easy to install
- INDIVIDUAL CONTROL Each point can be controlled individually by a traditional switch / Smartphone App / Alexa.
- No need to change existing wiring
- 100% online support
- 1 Year warranty

## Specifications:

- Rated voltage: AC 110V-240V, 50 / 60Hz
- Type: 4 Points on/off and 1 fan speed control switch, Individual point control
- Maximum Wattage per node: 1000W Resistive Load / 300VA Inductive Load @ 230VAC input
- Size: 110mm x 70mm x 25mm
- Plug & play/Hassle free installation
- Included IR remote in the box

Note: Neutral wire is mandatory for the connection

## **Switch to Smart Touch Switches**

A Smart Home cannot be built unless you install Smart Switches. These switches not only look different from the conventional switches, but they also work differently.

Using a single smart switch, you can activate all the electrical devices in a room. Thus, you no longer have to manually operate different switches & devices.

Wise & NAMO HiFi brings well-designed Smart Switches for a Smart Home. These switches have endured extensive quality tests to ensure longevity and optimum performance. You may control the actions of these switches through a mobile app or an IR remote. Thus, you can control the smart switches both remotely and manually.

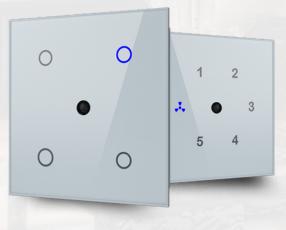

## Available in black and white colors

# **Switch to Smart Touch Switches**

#### WISE TOUCH SWITCH - 6A

#### Technical Specifications:

Rated Voltage: 115-240V AC 50/60 Hz Temperature Range: 0 to 60 Degree C Service Life: 1 Lakh Operations Rated Load: Capacitive (LED, CFL 100W max)

Inductive (EED, CFL TOOW max)
Resistive (Bulb, Halogen light 500W max)

#### WISE TOUCH SWITCH - 16A

#### Technical Specifications:

Rated Voltage: 115-240V AC 50/60 Hz Temperature Range: 0 to 60 Degree C Service Life: 1 Lakh Operations Response Time: 0.01 sec

Response Time : 0.01 sec

Rated Load: Capacitive (LED, CFL 200W max) Inductive (Fan, Motor 200W max) Resistive (Bulb, Halogen light 1000W max)

#### WISE TOUCH SWITCH - 30A

#### Technical Specifications:

Rated Voltage: 115-240V AC 50/60 Hz Temperature Range: 0 to 60 Degree C Service Life: 1 Lakh Operations

Rated Load: Capacitive (LED, CFL 400W max)

Inductive (Fan, Motor 400W max)
Resistive (Bulb, Halogen light 2000W max)

#### WISE TOUCH SWITCH - 4 TOUCH

## Technical Specifications :

Rated Voltage: 115-240V AC 50/60 Hz Temperature Range: 0 to 60 Degree C Service Life: 1 Lakh Operations

Rated Load: Capacitive (LED, CFL 100W max)

Inductive (Fan, Motor 100W max)
Resistive (Bulb, Halogen light 500W max)

## **Switch to Smart Touch Switches**

## WISE TOUCH SWITCH - FAN DIMMER

Technical Specifications:

Rated Voltage: 115-240V AC 50/60 Hz Temperature Range: 0 to 60 Degree C Service Life: 1 Lakh Operations Rated Load: Inductive (Fan 150W max)

## WISE TOUCH SWITCH - LIGHT DIMMER

Technical Specifications:

Rated Voltage: 150-240V AC 50/60 Hz Temperature Range: 0 to 60 Degree C Service Life: 1 Lakh Operations Rated Load: Capacitive (LED 50W max)

#### WISE TOUCH SWITCH - DOORBELL

Technical Specifications:

Rated Voltage: 150-240V AC 50/60 Hz Temperature Range: 0 to 60 Degree C Service Life: 1 Lakh Operations

Rated Load: Inductive (Doorbell 300W max)

# WISE TOUCH SWITCH - DOORBELL + SWITCH

Technical Specifications:

Rated Voltage: 115-240V AC 50/60 Hz Temperature Range: 0 to 60 Degree C Service Life: 1 Lakh Operations

Rated Load: Capacitive (LED, CFL 100W max)

Inductive (Doorbell 300W max) Resistive (Bulb, Halogen light 500W max)

## **Smart Customized Touch Switch Panels**

Design your own customized Smart Switch

Wise automation gives you infinite design choices. You can customize the smart electrical switch with your favorite photo.

- Available Module: 3 modules, 4 modules, 6 modules, 8 modules, 12 modules, 16 modules, and 18 modules.
- Available in Offline and Online Devices
- Customized Touch Switchboard with IR Remote which brings intuitive, responsive, and elegant lighting experience to your place.
- · Micro controller-based intelligent switching system.
- Touch-based switches are responsive to user-triggered actions.
- LED indication for On/Off status.
- · All switches are Shock Proof.
- Highly sensitive and capacitive touch.
- · Sturdy construction with reliable operation.
- All switches can be operated with remote/app/voice commands and hand touches.
- User friendly with longer functional life and low maintenance.

## **Smart Home Security**

At Qubo, we believe in creating technology that can assist, entertain, care and protect so that you are better connected to your world each passing day. Led by an eclectic mix of the young and seasoned, we aim to create connected solutions powered by advanced artificial intelligence making lives better connected to the things that matter the most. Every Qubo product comes with a fascinating innovation story and insights gleaned from years of consumer research.

Make your home a Safe, Private, Energy Efficient, Voice-Controlled **Smart Home** in minutes with NAMO HiFi.

## Works with

#### **Amazon Alexa**

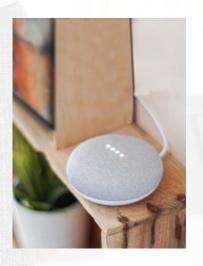

Alexa, Set AC to 22.

Control your favorite smart home devices using your voice with Alexa enabled speakers and displays.

## **Google Home**

Ok Google, turn on living room lights.

Control your smart home devices with Google Assistant enabled speakers and displays.

## PIR

## Passive Infrared Sensor

adopt a good sensitivity detector and an integrated circuit. This sensor gathers automatism, convenience, safety, energy-saving, and practical functions. It utilizes the infrared energy from the human body as a control signal source, and it can start the load at once when one enters the detection field. It can automatically identify day and night and is easy to install and a widely used product.

## Area of application

IR Motion Sensors can be used for a wide variety of applications at residential as well as commercial locations like complexes, malls, and offices They can be used for:

- Hospitals/Clinics
- Institutes/Schools/ Colleges/Universities
- Hostels/PG
- Transport: Railways/Airport/Bus Stand
- Corporate Offices/Government Offices
- Hotels
- Warehouses
- Manufacturing Companies
- Shopping Malls
